Introducing the 2018 Isuzu Elf (TSG-NPR85AN) — a 3-ton refrigerated freezer truck fitted with the advanced 4JJ1-HEII diesel-hybrid engine, combining the proven reliability of Isuzu's 2,990cc diesel powerplant with an integrated hybrid system designed to reduce fuel consumption and lower operating costs across high-frequency delivery routes. Paired with automatic transmission and right-hand drive, this high deck example represents one of the more technologically refined options in the used Japanese commercial truck market.

The automatic gearbox makes this Elf particularly well-suited for urban distribution environments where frequent stop-and-start driving is demanding on drivers and drivetrain alike — a meaningful advantage for fleet operators. Further equipped with air conditioning, airbag, ABS, back camera, power steering, power windows, double batteries and double wheels, this well-maintained hybrid freezer truck is available for worldwide export directly from Japan through Elegant Import & Export.
