Built for cold-chain logistics, the 2019 Isuzu Forward freezer truck pairs refrigerated capacity with the medium-duty reliability Isuzu is known for. Riding on the 2RG-FTR90V2 chassis, it carries a 7.6 ton payload rating and a high deck body suited to pallet loading and regional distribution work.

Power comes from Isuzu's 4HK1, a 5,190cc inline four-cylinder turbo diesel rated at 240 PS. It is one of the most widely deployed medium-duty diesels in the world, which matters to an importer, as parts supply and workshop familiarity are already established across Asia, Africa and the Pacific. Drive runs through a manual transmission to the rear wheels, with a twin rear wheel setup keeping the truck planted under a full refrigerated load.

A two seat cab and an accident-free record round out a straightforward working unit. This used Isuzu Forward for sale suits frozen food distribution, seafood and meat haulage, dairy and ice cream delivery, and any route where temperature control cannot slip. Available now for worldwide export from Japan, with Elegant Import & Export managing documentation and shipping throughout.
